

## Danske Bank Message Implementation Guide

Common Global Implementation (CGI)

Customer Credit Transfer pain.001.001.03

This document defines how a CustomerCreditTransferInitiation message should be structured when sent to Danske Bank.

The Danske Bank Message Implementation Guide (MIG) of the CustomerCreditTransferInitiation (CCT) message complies with the international definition for contents and use of an ISO 20022 pain.001.001.03 CustomerCreditTransferInitiation, the Common Global Implementation (CGI) CustomerCreditTransferInitiation recommendations and the country specific recommendations in Denmark, Finland and Norway.

Please note that Swedish payment types are implemented based on Danske Bank interpretation due to the fact that no country specific recommendations have been published yet.

For further information about the Common Global Implementation initiative please refer to <http://www.swift.com/cgi>

Files sent to Danske Bank must be valid according to the XML Schema for pain.001.001.03 as published on the <http://www.iso20022.org> website.

### XML Header:

The XML header must follow the recommendation from <http://www.iso20022.org>:

```
<?xml version="1.0" encoding="utf-8"?>
```

```
<Document xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xmlns="urn:iso:std:iso:20022:tech:xsd:pain.001.001.03">
```

### Character set

The following character set can be used: ISO8859-1, ISO8859-15 and UTF-8

Note: We advise customers to use character set ISO 8859-1 or ISO 8859-15 when the following options are both true for a pain.001.001.03 file:

- The file is protected with Danske Bank EDISec security (encrypted and/or signed)
- The file contains certain special characters like the Scandinavian letters {æ, ø, å, ö, ä, Æ, Ø, Ö, Ä}

The document includes information in the form of a table concerning the structure of a message as well as the contents of a message. Some columns refer to the Common Global Implementation MIG of the CustomerCreditTransferInitiation. One column refers to the country specific recommendations and the Danske Bank column contains the interpretation made by Danske Bank and explains the usage of the tags in Danske Bank.

**Therefore please pay attention to the column "Danske Bank Comments" when implementing support for CCT files to be sent to Danske Bank**

# Danske Bank Message Implementation Guide

Common Global Implementation (CGI)

Customer Credit Transfer pain.001.001.03

Tags with CGI attribute 'NU' for Not used both in the CGI MIG for CCT and the country specific recommendations are hidden in the document.

The table below explains the usage of the columns.

Column Header	Contents
ISO Index no.	The index used by the CGI initiative in the official Customer Credit Transfer Initiation V3 pain.001.001.03
Or	Select one or the other field, but not both
Message Item	Message Item used by the CGI initiative in the official Customer Credit Transfer Initiation V3 pain.001.001.03
Tag Name	Tag Name used by the CGI initiative in the official Customer Credit Transfer Initiation V3 pain.001.001.03
Mult.	(0..1) - Element is optional (1..1) - Element is required (0..n) - Optional with unlimited repetition (1..n) - Required with unlimited repetition
Type	Description of all data types and components used
ISO Definition	ISO Definition of Message Item
ACH-Domestic & Intl	CGI definition: General usage is equivalent to low value or non-urgent transactions. Typically associated with a batch process and/or low priority transactions.
Wires - Domestic & Intl	CGI definition: General usage is equivalent to high value or urgent transactions with high priority.
Cheques/Drafts	CGI definition: Typically, paper based transactions.
SEPA Customer to Bank ONLY	SEPA Customer to Bank ONLY
CGI Rules	CGI Rules used by the CGI initiative in the official Customer Credit Transfer Initiation V3 pain.001.001.03
Country specific MIG's	Comments copied from the country specific Message Implementation Guides in Denmark, Finland and Norway as defined by the Bankers Association in each country and from recommendation from IPSO (Ireland). For further information please refer to the local web sites in each country.
Danske Bank Comments	Danske Bank usage of the tags. Applies to all countries that Danske Bank Group operate within.

Attributes		
Codes	Term	Definition
R/M	Required	Required either by schema or CGI
C	Conditional	Dependent upon a certain condition
BD	Bilaterally Determined	Contents are bilaterally determined between client and bank
XOR	eXclusive Or	Contents are XOR either by the schema or CGI usage. Select one or the other field, but not both
NU	Not Used	Not used by CGI

Color/Background	Meaning
	Root tag of message
	Level Component Tag; no data content
	Component Tag; no data content
	Data Tag not used
