

Danske Bank Message Implementation Guide
Common Global Implementation (CGI)
Customer Payment Status Report pain.002.001.03

This document defines how a CustomerPaymentStatusReport will be structured when sent from Danske Bank.

The Danske Bank Message Implementation Guide (MIG) of the CustomerPaymentStatusReport (CPRS) message complies with the international definition for contents and use of an ISO 20022 pain.002.001.03 CustomerPaymentStatusReport, the Common Global Implementation (CGI) CustomerPayment StatusReport recommendations and the country specific recommendations in Denmark, Finland and Norway.

Please note that CPRS on Swedish payments are implemented based on Danske Bank interpretation due to the fact that no country specific recommendations have been published yet.

For further information about the Common Global Implementation initiative please refer to <http://www.swift.com/cgi>

Files sent by Danske Bank will be valid according to the XML Schema for pain.002.001.03 as published on the <http://www.iso20022.org> website.

Character set

The following character set can be used: ISO8859-1, ISO8859-15 and UTF-8

The character set used in the incoming CustomerCreditTransferInitiation will also be used in the CustomerPaymentStatusReport.

The document includes information in the form of a table concerning the structure of a message as well as the contents of a message. Some columns refer to the Common Global Implementation MIG of the CustomerPaymentStatusReport. One column refers to the country specific recommendations and the two Danske Bank columns contain the interpretation made by Danske Bank and explain the usage of the tags in Danske Bank.

Therefore please pay attention to the column "Danske Bank Comments" when implementing support for CPRS files sent by Danske Bank.

Tags with CGI attribute 'NU' for Not used are hidden in the document
