

Changes to the use of Norwegian Telepay format v. 2.1

Change log

Version	Date	Change
2.1	2014-01-07	Updated to match Telepay version 2.1

The description only includes fields where the bank's use of the format deviates from standard. If a data element is not used, this means that the contents will be ignored upon receipt. The contents of the field will, however, be sent back in the return file.

For a complete description of Telepay version 2.1 please refer to Bankenes Standardiseringskontors (BSK) web-site www.bsk.no:

Application header:		
Data element:	Position:	Description:

Sigill: Interface	278	For use contact Danske Bank
Sigill: Control field	279 – 296	For use contact Danske Bank
Version software	297 – 312	Not used
Version bank	313 – 320	Not used

Changes to the use of Norwegian Telepay format v. 2.1

General comments and clarifications:

Subject:	BSK version 2.01		Description:
	Page:	Section:	
Check for duplicate transmission	6	2.1.5 2.1.6 2.1.7	We do not check for duplicate transmission of files on the basis of sequence numbers (in the application header) and sequence control fields (in all records). Instead, we perform a technical check by calculating a "hash total" of the first 30,000 characters in the file. The result is compared with files sent in earlier and, if the same "hash total" is registered on one of these, the transmission will be rejected.
Reply data	7	2.2	The customer may choose whether the settlement return file must also contain information on deleted transactions. It is also possible to have the settlement return data split, which will result in invoice and salary transactions being delivered in separate files.
Rejection levels	8	2.2.1	We support the following rejection levels: <ul style="list-style-type: none"> • File (the whole file sent in) • Batch (BETFOR00 – BETFOR99) • Transaction (BETFOR01 or BETFOR21) • Single transaction (BETFOR04 or BETFOR22/23)
Name and address of beneficiary	12	4.1	We do not require the full name and address of the beneficiary to be filled out. The payment will be accepted if just the name (BETFOR03 position 116-150) is filled out
Charges abroad/in Norway	16	4.3.2	The combination: Charges abroad = OUR (BETFOR01 pos. 123-125) and Charges in Norway = BEN (BETFOR01 pos. 126-128) is not supported. The payment will not be rejected, however, instead the invalid combination will be replaced by default values for the two fields (Charges abroad = BEN and Charges in Norway = OUR).
Ordered transferred amount	16 34	4.3.2 6	The return field "Ordered transferred amount" (BETFOR01 position 294-309) is interpreted as the sum of all the BETFOR04 records sent in under the BETFOR01 concerned. This means that amounts in erroneous or deleted BETFOR04 records will also be included. Erroneous records will only be included, however, if the amount can be determined.

Changes to the use of Norwegian Telepay format v. 2.1

Subject:	BSK version 2.01		Description:			
	Page:	Section:				
Price info	16 35	4.3.2 6	The return field "Price info" (BETFOR01 pos. 310) is filled out as follows:			
			<i>The customer has an agreement with the bank on accumulating fees:</i>		Charges in Norway (pos. 126-128)	
					OUR	BEN
			Charges abroad (pos. 123-125)	OUR	2	-
				BEN	2	3
			<i>The customer has <u>no</u> agreement with the bank on accumulating fees:</i>		Charges in Norway (pos. 126-128)	
					OUR	BEN
			Charges abroad (pos. 123-125)	OUR	1	-
				BEN	1	3
			The numbers shown in the chart mean the following:			
1. Fees are debited to the account separately or with the transfer amount						
2. Fees are accumulated and invoiced the following month						
3. Fees are deducted from the quoted transfer amount.						
Booking on customer account and content of return file R2	30	6	<u>The customer has an agreement with the bank on accumulating fees:</u>			
			Information in the R2 file in BETFOR01: "Amount debited" (pos. 215-230) = debited amount without fee and "Fee" (pos. 272-280) = kr. 0,-			
			Booking on customer account: The customer's account is debited for "Amount debited" without the fee. Fees are accumulated and charged monthly or quarterly.			
			<u>The customer has no agreement with the bank on accumulating fees:</u>			
			Information in the R2 file in BETFOR01: "Amount debited" (pos. 215-230) = debited amount without fee and "Fee" (pos. 272-280) = fee charged			
			Booking on customer account: The customer's account is debited "Amount debited" + "Fee" in one total amount.			

Changes to the use of Norwegian Telepay format v. 2.1

Subject:	BSK version 2.01		Description:
	Page:	Section:	
Total amount batch	28 38	5.3.5 6	The return field "Total amount batch" (BETFOR99 position 89-103) will contain the total sum for the batch in question. BSK has confirmed this interpretation of the field.
