

## FEE Global Service Code Report sent to customer in comma separated file format (FEEGSC).

This format describes the layout of corporate report files containing FEE Global Service Code Report data.

Every file starts with a line (record) containing header columns (one header for every data column, in customer language) followed by a number of lines (records) containing the data columns.

(AN in "Format" column means alphanumeric)

| Field<br>no. | Field code                | Max.<br>no. of<br>chars. | Format | Description  |
|--------------|---------------------------|--------------------------|--------|--|
| 1            | Group name                | 40                       | AN     | Internal group name  |
| 2            | Group number              | 24                       | AN     | Primary external group number  |
| 3            | Customer name             | 40                       | AN     | Internal customer name   |
| 4            | Customer number           | 24                       | AN     | Primary external customer number   |
| 5            | Account number            | 34                       | AN     | External account number for which the sums are calculated  |
| 6            | Account country code      | 02                       | AN     | Country code for above account number  |
| 7            | Account currency code     | 03                       | AN     | Currency code for above account number   |
| 8            | Account number            | 34                       | AN     | External account number for where the sums are booked.   |
| 9            | Account country code      | 02                       | AN     | Country code for above account number  |
| 10           | Global Service Code       | 08                       | AN     | Global Service Code as defined by AFP (Association for Financial Professionals)  |
| 11           | Fee type                  | 69                       | AN     | Fee entry text   |
| 12           | Level 1                   | 69                       | AN     | Text describing the level (dep. on language)   |
| 13           | Level 2                   | 69                       | AN     | Text describing the level (dep. on language)   |
| 14           | Level 3                   | 69                       | AN     | Text describing the level (dep. on language)   |
| 15           | Level 4                   | 69                       | AN     | Text describing the level (dep. on language)   |
| 16           | Level 5                   | 69                       | AN     | Text describing the level (dep. on language)   |
| 17           | Start period              | 8                        | AN     | Start date for the report (YYYYMMDD)   |
| 18           | End period                | 8                        | AN     | End date for the report (УУУУММDD)   |
| 19           | Number of transactions    | 10                       | AN     | Number of transactions – edited with thousand separators (according to national rules)   |
| 20           | Currency code             | 3                        | AN     | Currency code in which the sums are calculated   |
| 21           | Booked sum                | 29                       | AN     | Booked sum – edited with decimal point and thousand separators (according to national rules)   |
