## Standard format for joint in payment forms [form types 71, 73 and 75]

Change log

| Version | Date | Change |
| :--- | :--- | :--- |
| 1 | $2013-10-07$ | Change log added |
| 2 | $2022-10-01$ | Danske Bank Teleservice is changed to District |

If you want to use the standard format for the joint in payment forms of the financial sector, please note that operations are being performed at 3 levels:

* Delivery start/end
* Section start/end
* Payment records

Delivery start/end must occur only once for each delivery.

Section start/end may occur several times for each delivery. The decisive factor is whether the credit number or the account number have changed. The change of account number may be made for both the creditor number and the fee account number

The number of payment records may vary. The number of records for each in payment form may vary dependent on the type of form.

As opposed to the other "Bank to customer" formats this format is a fixed format.

Advice on joint in payment forms may on rare occasions be delayed because of technical difficulties, for instance when another bank does not submit data on in payment forms to Danske Bank on time. When the complete delivery is created later on it must be retrieved in the usual way.

## Delivery start record

| No. | Field code | No. of pos. | Format | Fromto | Description |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | System ID | 2 | Alpha-n. | 1-2 | Is permanently stated as FI, which signifies Joint In payment Form |
| 2 | Record type | 3 | Num. | 3-5 | 010 |
| 3 | Data remitter | 8 | Num. | 6-13 | VAT-number of bank. (61126228 in District) |
| 4 | Data recipient | 10 | Alpha-n. | 14-23 | VAT-number/Civil Reg.-number or other identification of Data recipient. District Contract no. |
| 5 | Delivery number | 10 | Alpha-n. | 24-33 | Remitter identification of the delivery, justified left, followed by blanks. Serial number, if any. (CMM in deliveries from District) |
| 6 | Delivery ID | 10 | Num. | 34-43 | Voluntary specification of the delivery. TeleService order no. YYMMDDxxxx (xxx=no.) |
| 7 | Date of creation | 8 | Num. | 44-51 | Date when the section was created. Format YYYYMMDD |
| 8 | Time of creation | 4 | Num. | 52-55 | Time when the section was created.. Format: hhmm |
| 9 | Format version | 2 | Alpha-n. | 56-57 | Version number to decide on the format to be used. Stated with leading zeros. |
| 10 | Prod-test | 1 | Alpha-n. | 58-58 | $\begin{aligned} & \mathrm{P}=\text { Production data } \\ & \mathrm{T}=\text { Test data } \end{aligned}$ |
| 11 | Filler | 70 | Alpha-n. | 59-128 | Blanks |

## Section start record

| Nr | Field code | No. of <br> pos. | Format | From- <br> to | Description |
| :---: | :--- | :---: | :--- | :---: | :--- |
| 1 | System ID | 2 | Alpha-n. | $1-2$ | Is permanently stated as FI, <br> which signifies Joint Inpayment <br> Form |
| 2 | Record type | 3 | Num. | $3-5$ | 020 |
| 3 | Creditor number | 8 | Num. | $6-13$ | Creditor number (* |
| 4 | Account number | 14 | Num. | $14-27$ | Creditor's account no. with his <br> bank, to which the payment <br> amount is credited. Stated with <br> the bank's Reg.no. of 4 digits <br> and a 10-digit account no. |
| 5 | Fee account <br> number | 14 | Num. | $28-41$ | Creditor's account no. with his <br> bank, to which the fee in con- <br> nection with the inpayment form <br> is credited. Stated with the <br> bank's Reg.no. of 4 digits and a <br> 10-digit account no. |
| 6 | Section number | 10 | Num. | $42-51$ | Voluntary specific ation of the <br> section. The sections are serially <br> numbered within the delivery <br> with leading zeros. |
| 7 | Date of creation | 8 | Num. | $52-59$ | Date when the section was <br> created. Format YYYYMMDD |
| 8 | Time of creation | 4 | Alpha-n. | $60-63$ | Time when the section was <br> created. Format: hhmm |
| 9 | Format version | 2 | Alpha-n. | $64-65$ | Version number to decide on the <br> format to be used. Stated with <br> leading zeros. |
| 10 | Filler | 63 | Alpha-n. | $66-128$ | Blanks |

*) Danish Payment Systems (PBS) controls a joint creditor register for all commercial banks and savings banks. The creditor register contains the Creditor number, creditor's abbreviated name of max 16 characters, and the Reg. no. of creditor's bank/bookkeeping centre.

## Payment record

| Nr | Field code | No. of <br> pos. | Format | From- <br> to | Description |
| :---: | :--- | :---: | :--- | :---: | :--- |
| 1 | System ID | 2 | Alpha-n. | $1-2$ | Is permanently stated as FI, <br> which signifies Joint Inpayment <br> Form |
| 2 | Record type | 3 | Num. | $3-5$ | 030 |
| 3 | Payment date | 8 | Num. | $6-13$ | Date of payment at the place of <br> payment. For envelope solutions <br> date is the date on which the <br> debtor's account was debited. <br> Format: YYYYMMDD |
| 4 | Form type code | 2 | Num. | $14-15$ | Form type code from the <br> inpayment form - 71, 73 and 75 |
| 5 | Payer ID | 19 | Num. | $16-34$ | Blank if form type $=73$. <br> For form types 71 and 75: <br> Number that enables an <br> identific ation of the payer. The <br> number is justified right with <br> leading zeros and must observe <br> modulus 10 with a check digit at <br> last position |
| 6 | Archive number | 22 | Alpha-n. | $35-56$ | Number which makes it possible <br> to track the inpayment form in <br> the archives at the place of pay- <br> ment. |
| 7 | Booking date | 8 | Num. | $57-64$ | Date on which the payment was <br> booked. <br> Format: YYYYMMDD |
| 8 | Credit amount | 15 | Num. | $65-79$ | States the payment amount, <br> justified right in øre with leading |

|  |  |  |  |  | zeros. |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 9 | Sum entry <br> reference | 22 | Alpha-n. | $80-$ <br> 101 | Serial number for the linking of <br> the payment amount to booking <br> entries on account statements. <br> (Optional). Blank in TeleService |

To be continued overleaf
... Payment record/inpayment form continued....

| Nr | Field code | No. of pos. | Format | From-to | Description |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 10 | Fee type | 2 | Alpha-n. | $\begin{gathered} 102- \\ 103 \end{gathered}$ | States fee types as a result of errors. The Inpayment form was not: <br> Code AA = OCR-readable *) <br> Code $\mathrm{BB}=$ Contained modulus error Code $\mathrm{AB}=$ not OCRreadable and modulus error Code CC = correct |
| 11 | Fee amounts | 9 | Num. | $\begin{gathered} 104- \\ 112 \end{gathered}$ | Refers to the fee type. The amount is justified right in $\varnothing$ re with leading zeros. |
| 12 | Reversal | 1 | Alpha-n. | $\begin{gathered} 113- \\ 113 \end{gathered}$ | Marking for whether the payment has been reversed. " N " = It is an ordinary payment " $\mathrm{J} "=\mathrm{It}$ is a reversal of the amount in the field Credit amount. It does not have to be the original amount. <br> Field 9, which is optional, does not have to be filled in, the rest must be filled in with valid data. (District uses only N) |
| 13 | Filler | 15 | Alpha-n. | $\begin{gathered} 114- \\ 128 \\ \hline \end{gathered}$ | Blanks |

*) Optical Character Recognition enables pre-programmed computers to optically read certain characters. The type face used on the inpayment form is OCR-B font size 1. If permission has been obtained, the filling-in may also be done by using matrix print and laser print.

The type face is described in detail in ISO Recommendation R 1073/ii, most recently revised in 1976, and in DS 2081.

## Payment record

Name or address, text

| Nr | Field code | No. of <br> pos. | Format | From- <br> to | Description |
| :---: | :--- | :---: | :--- | :---: | :--- |
| 1 | System ID | 2 | Alpha-n. | $1-2$ | Is permanently stated as FI, <br> which signifies Joint Inpayment <br> Form |
